Into the open

A new era awaits us, offering greater freedom and enjoyment than the one we are leaving. We want to meet up, talk and socialize, as well as strike up new, exciting friendships. Places to do this can be found everywhere: in the streets, in courtyards and in parks – with everything within easy reach under an open sky. Life is waiting just outside your door – so come on out!

Table 9A 120 and Armchair A2 in teak with hot galvanized base.

Sofa 5 in teak with hot galvanized base.
The wooden components on this spread have been oiled, producing a darker nuance.

Here you see Chair 1, Armchair A2, Table B31 170, Table B31 84 and Bench 9. All in teak with hot galvanized base. The wooden components have been oiled, producing a darker nuance. They are, however, delivered unoiled.

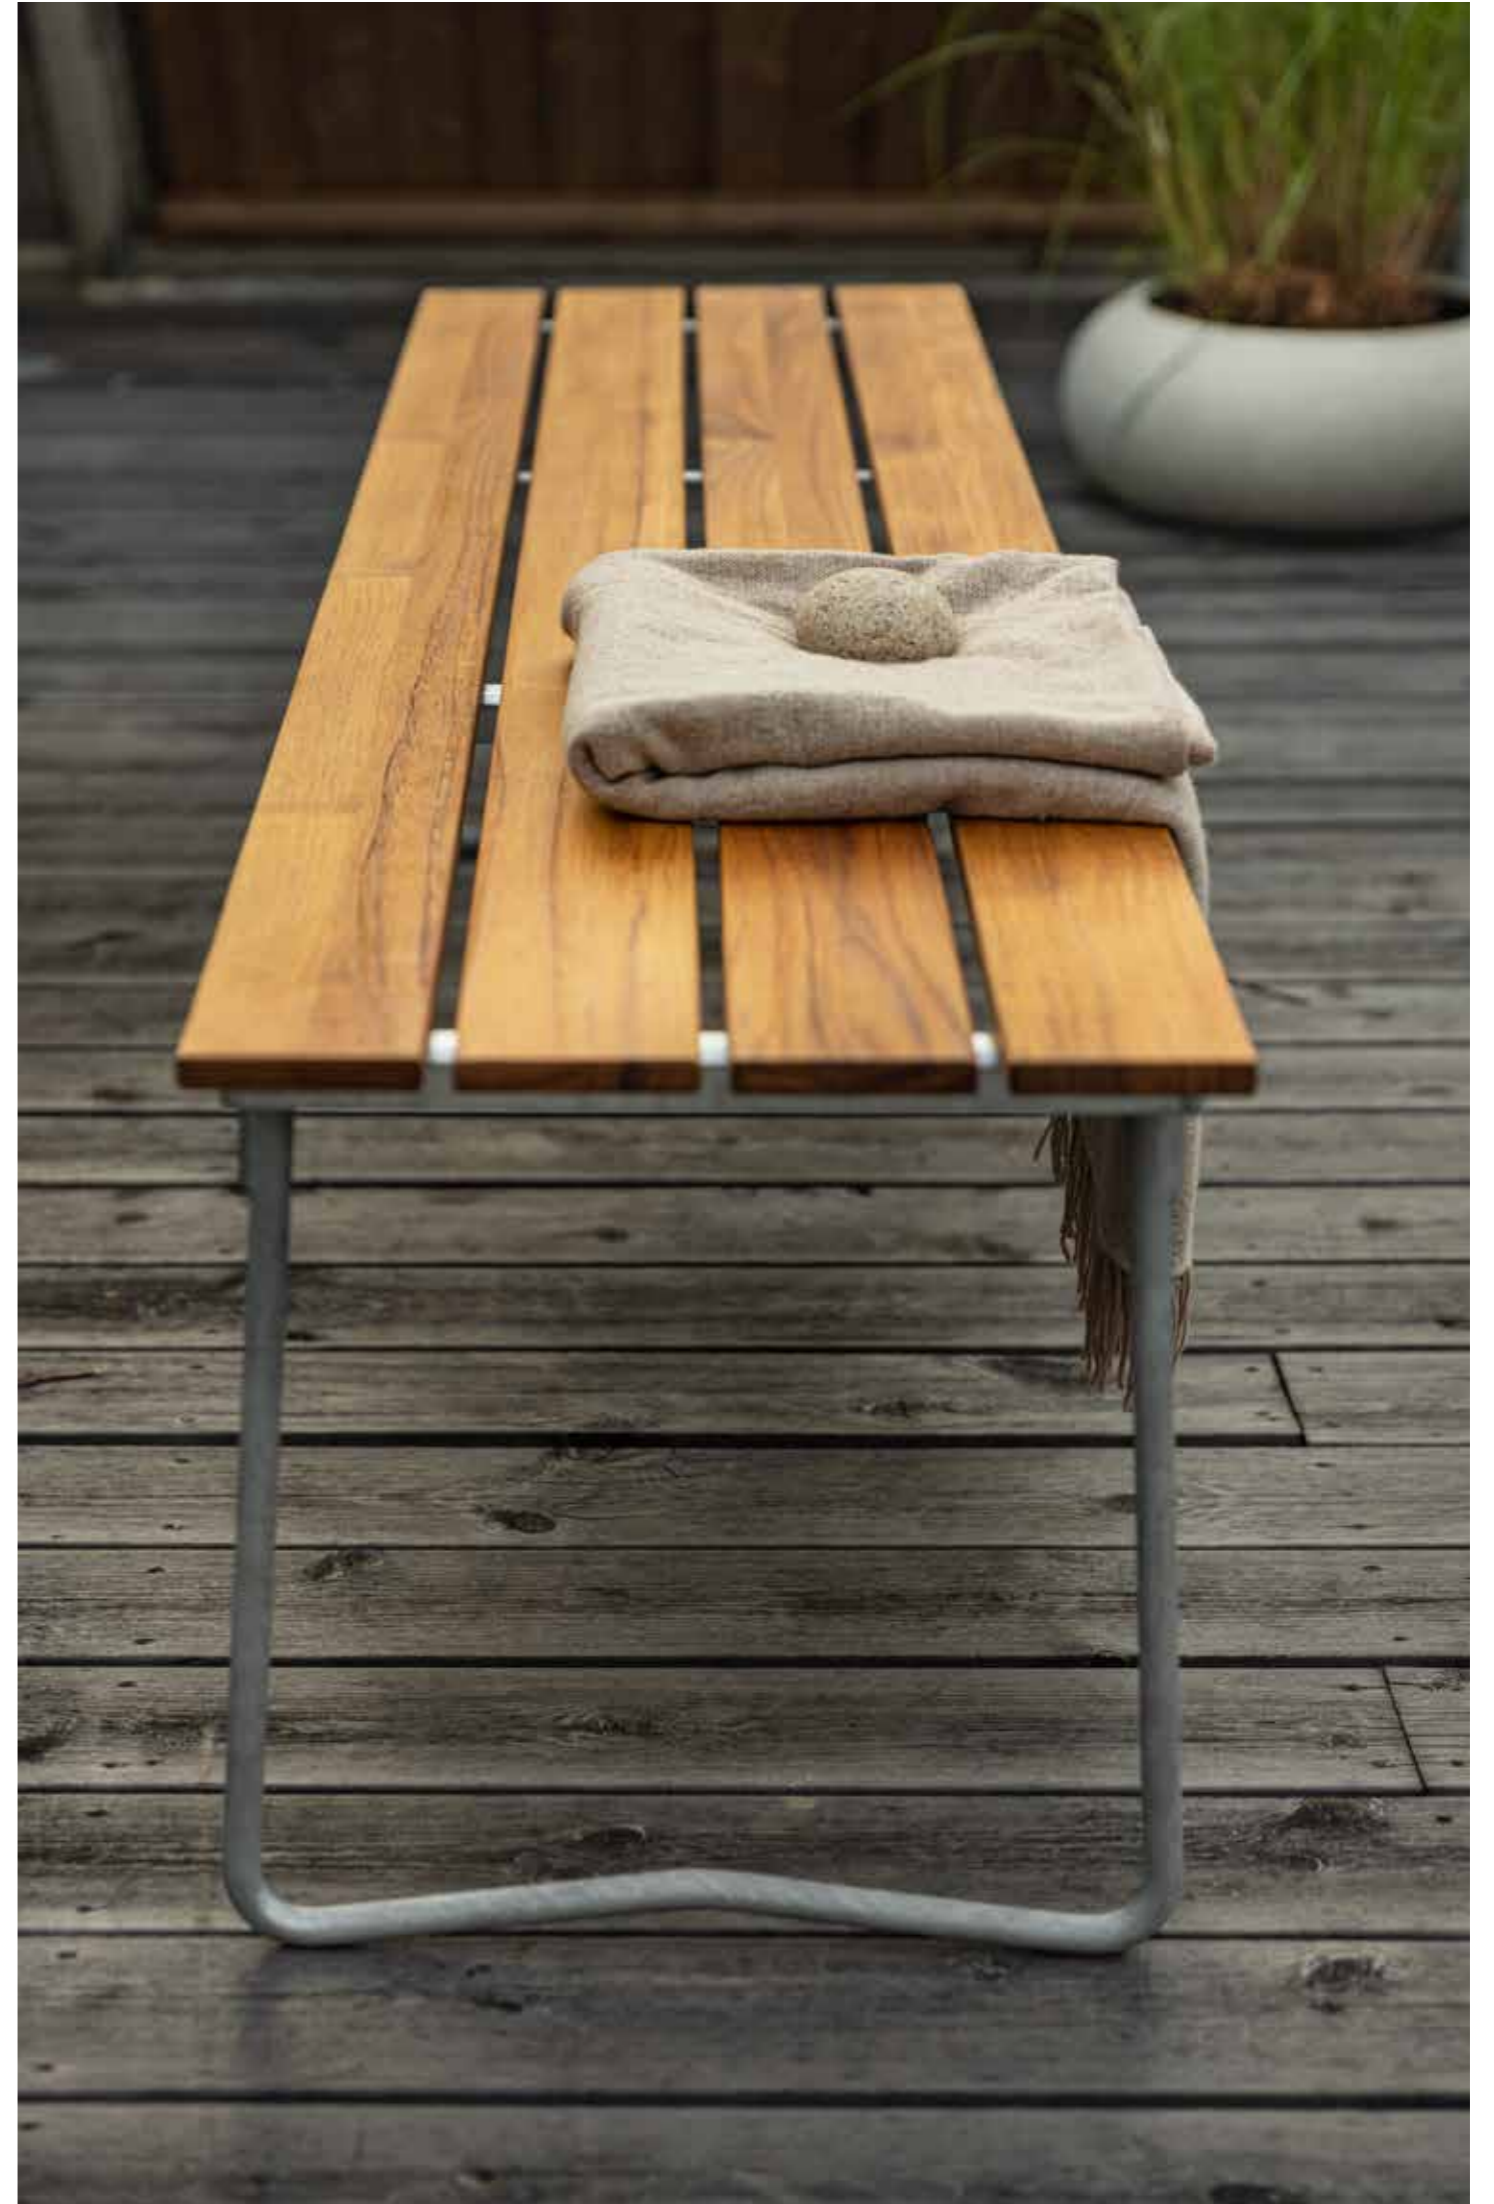

Armchair A2, Table B31 170, teak with hot galvanized base.

Chair 1 and Table B31 84 in teak with hot galvanized base.

Sit down and feel the rocking sensation to understand why the Classic Series has a special place in so many hearts. Armchair A2 was originally launched at the 1930 Stockholm Exhibition and, together with its siblings, remains a cherished feature of many gardens and outdoor spaces. The furniture's clean lines and the comfortable chairs are soothing for both body and soul.

Bench 9 in teak with hot galvanized base. The wooden components on this spread have been oiled, producing a darker nuance.

Pictured are Sunlounger A3, Stool A3 and Side table L45 in teak with hot galvanized bases. The wooden components on this spread have been oiled, producing a darker nuance.

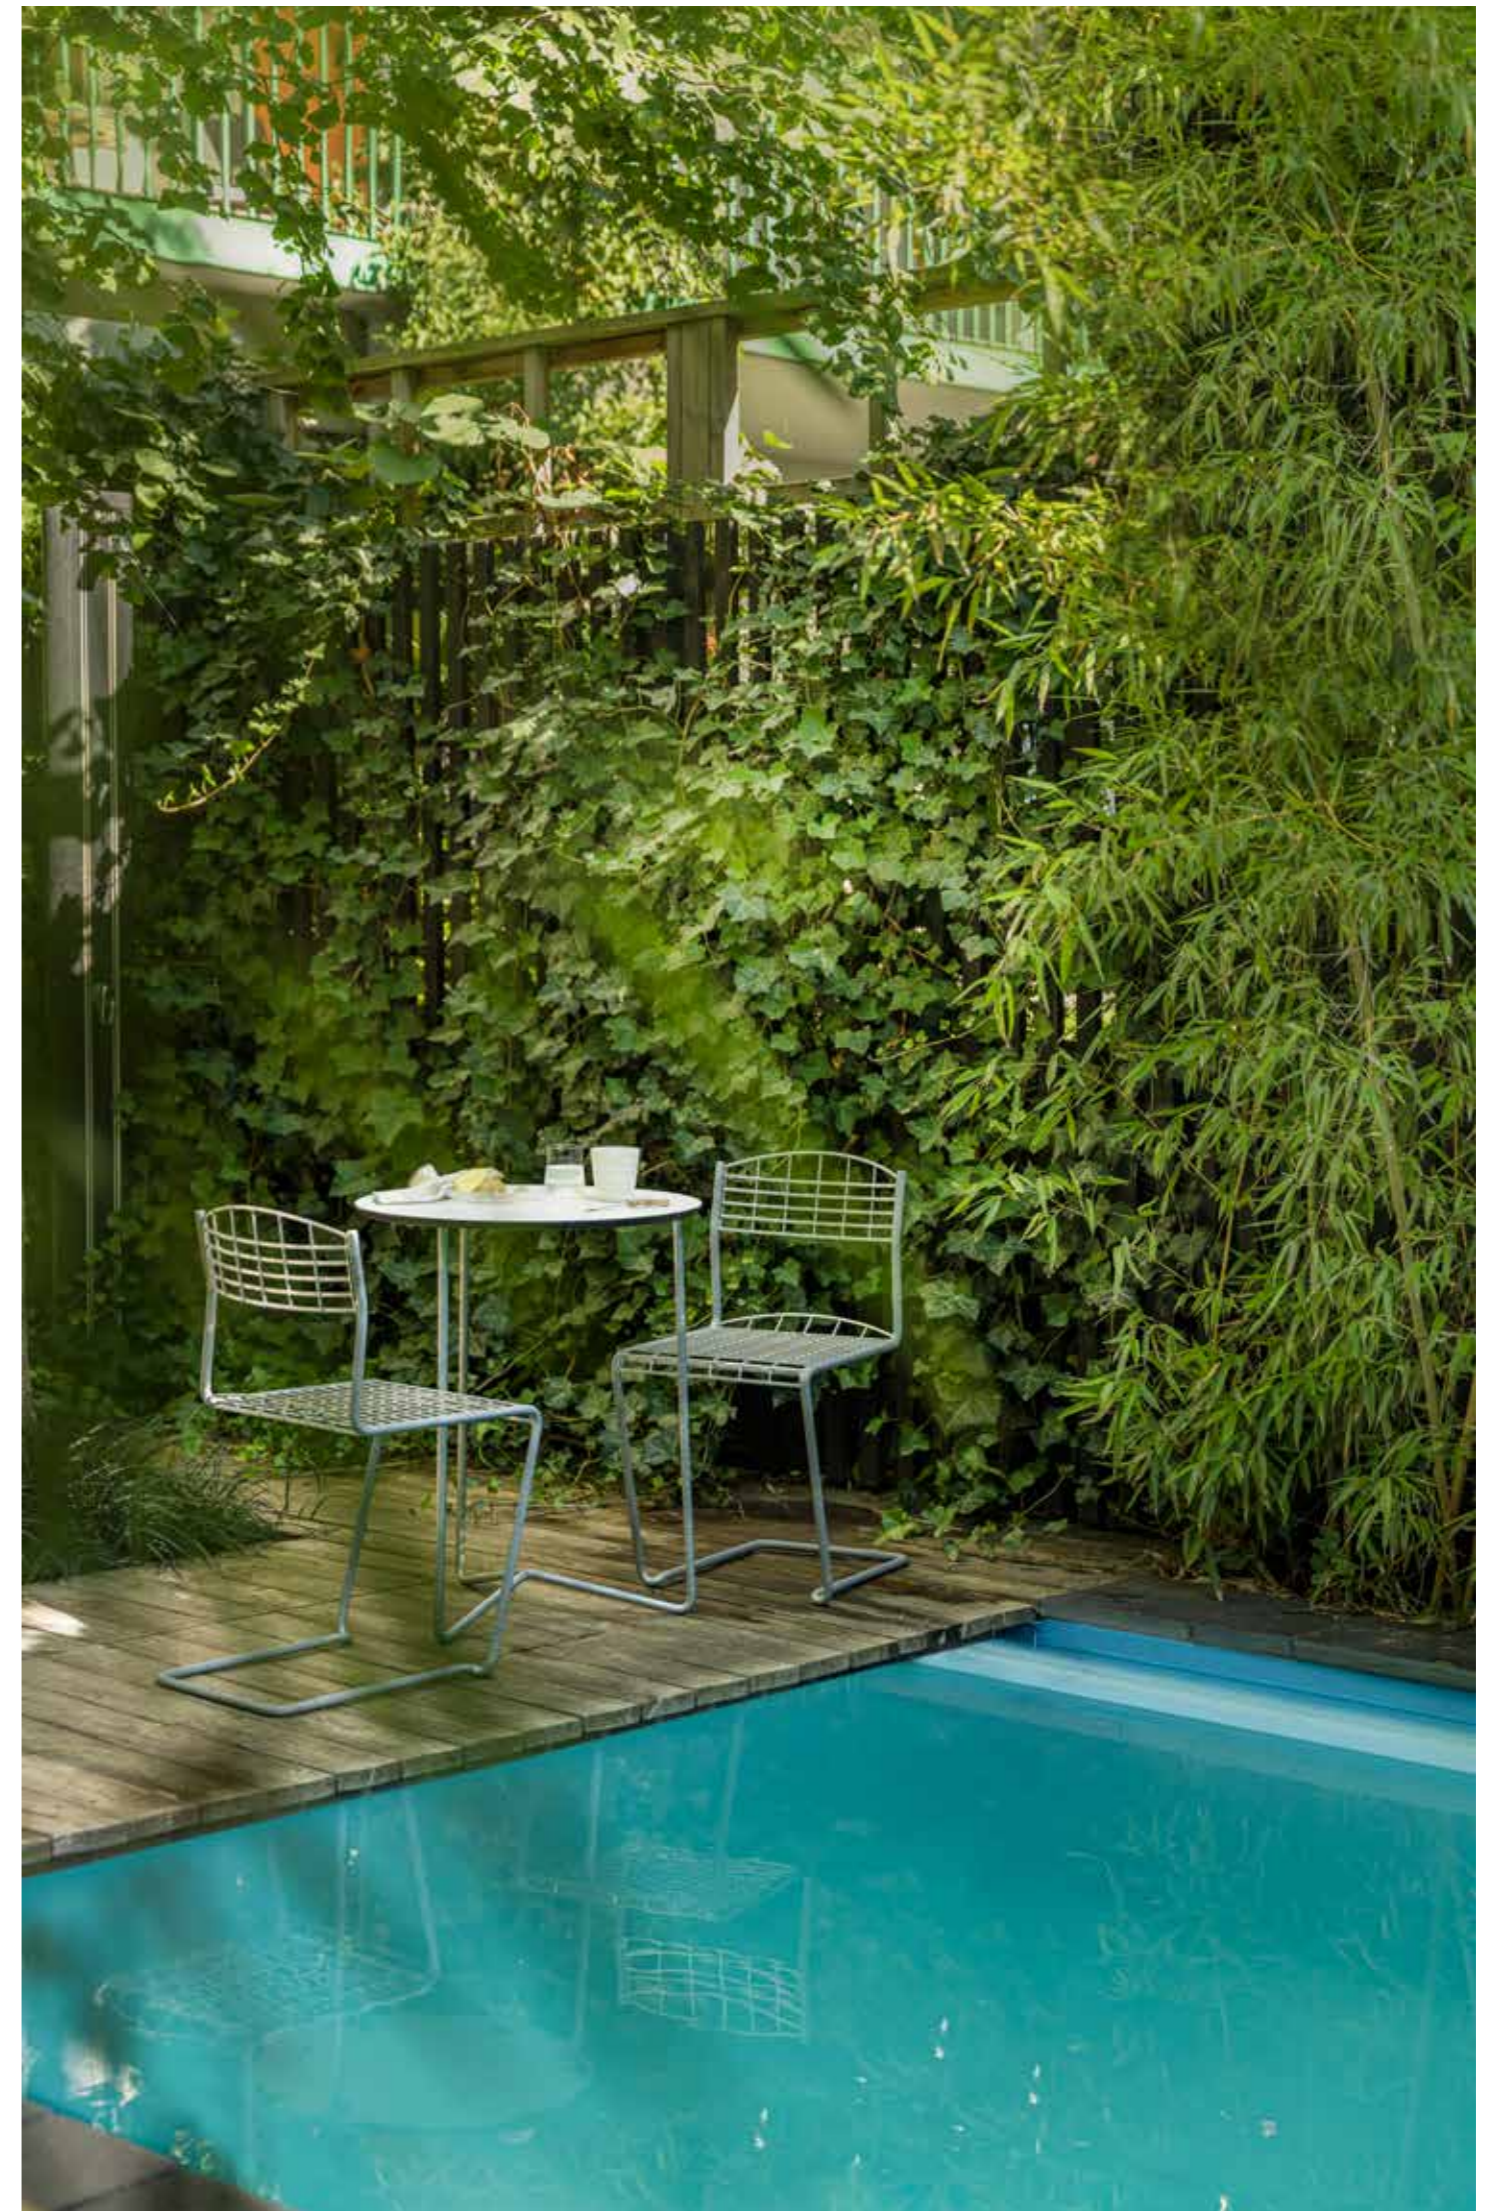

The furniture in the Classic Series work equally well either separately or combined. Place a solitary chair or a sofa in your garden to create an inviting place for daydreaming. Or why not place a few chairs somewhere you would not normally consider. The results may surprise you. All wood is sourced from forests that are managed responsibly, and we manufacture the furniture at our factory in Grythyttan, just as we have always done.

High Tech

We were transported to a new age when Nisse Strinning presented his High Tech chair in 1984, the same year that Steve Jobs launched the Macintosh computer and Depeche Mode released their classic synth-pop album Some Great Reward. This is a chair with a bold design that still stands out, showing the way to the future. The steel chairs and bases are available in a hot galvanized or powder coated finish and are equally well suited to indoor and outdoor use. The white tabletops in compact laminate are highly durable and built for a long and eventful lifetime.

High Tech Chair, hot galvanized. High Tech Table 90, hot galvanized with white compact laminate top.

High Tech Chair, hot galvanized. High Tech Table 60, hot galvanized with white compact laminate top.

Libelle

Libelle is one of Grythytan's new products for the year, conceived by the award-winning Norwegian designer Andreas Engesvik. The chair is fully welded, providing both resilience and strength while remaining compact and graceful.

Andreas Engesvik

Andreas Engesvik is one of the foremost contemporary designers in Norway. Within the world of design, he has made a name for himself in everything from furniture and tableware to industrial design, with commissions for international clients such as Iittala, Muuto, Ligne Roset and Foggia. Over the years, Andreas has won numerous awards, including the Red Dot Award, the Wallpaper Design Award and the Bruno Mathsson Award.

Libelle chair and Libelle table in a green powder coated finish.

Firm seating the entire evening

The Brewery Series has its origins in the beer houses of the late 1800s. The tables and chairs are designed to offer comfort and stability, even if the evening becomes long and cheerful. The secret lies in the solid materials. The hot galvanized bases and sturdy wood work their magic in the garden the entire outdoor season, year after year.

Brewery bench, Brewery chair och Brewery table 110 in teak with hot galvanized bases.

Brewery chair och Brewery tripod table teak with hot galvanized bases. The wooden components on this spread have been oiled, producing a darker nuance.

Akleja

The Swedish designer Jonas Bohlin is the creator of the Akleja chair being launched by Grythyttan Stålmöbler in 2022. The chair came about during work on Tommy Myllymäki's highly acclaimed restaurant AIRA at Djurgården, Stockholm, which is reflected in the material and the construction, both specially designed to cope with the challenging conditions of the Saltsjön shoreline.

Akleja chair and Akleja table in untreated teak with dark grey base.

Jonas Bohlin

Jonas Bohlin is one of the most famous designers and interior architect in Sweden. His commissions include a number of legendary Stockholm restaurants, such as Riche, Teatergrillen and Sturehof. Back in 1981, he also designed our Concrete chair, which received the Excellent Swedish Design award.

Wood – a living material

The wooden components of our furniture are made from teak, pine or South American oak and are always of the highest quality. This allows our furniture to age gracefully, even gaining in beauty when used frequently. Just like any other living material, the wood is affected by humidity levels, direct sunlight and more. If you care for your furniture, you will be able to enjoy the lustrous wood finish for many years to come, even though kept outdoors.

Not all pine is created equal. Since our furniture is to be of the highest quality, we only use timber with standing annual rings in our pine furniture. This means that the annual rings are parallel to the short side, meaning no risk of the planks warping. This also ensures a harder product surface, meaning wooden components that better retain their shape and are less prone to cracking.

This is how we extract our pine timber to ensure maximum hardness and torsional stiffness.

We care about our trees

When buying one of our products, naturally you are entitled to know where the material comes from and how it was produced. This is why we work with certification and ecolabelling, enabling you to always track the material throughout the entire production chain, from raw material to finished product.

The wooden components of our furniture have environmental certificates from two leading organizations who share our view of responsible forestry. These certificates guarantee that the materials in the products you buy from us always meet high social and environmental standards:

FSC®

Our teak and South American oak components are 100% FSC certified by the Forest Stewardship Council®. The FSC® works for the environmentally friendly, socially responsible and economically viable management of the world's forests. The FSC® is an international organization with its members spanning various environmental organizations, social organizations and financial stakeholders. Look for the FSC® label on our products.

PEFC™

Our pine components are, with one exception*, PEFC™ certified by the Programme for the Endorsement of Forest Certification. PEFC is an international organization with its members comprising various forest companies. The organization works to promote sustainable forestry with a focus on environmental, economic and social aspects.

* Sofa 5 in pine cannot yet be supplied with PEFC certification or FSC certification due to technical aspects of the production process, although we are working to remedy this.

Our products

THE CLASSIC SERIES

The Classic Series is characterized by a pleasant rocking sensation. Combine chairs, tables and sofas as you like – furniture from the Classic Series always delivers on style. Choose between teak, South American oak and pine. All sitting furniture comes with a solid steel base for maximum durability. The steel is hot galvanized to handle tough conditions and all wood used in our production is sustainably sourced (FSC® or PEFC™).

GRYTHYTAN STÅLMÖBLER – THE BOOK

The beautiful book Grythyttan Stålmöbler – The story of a Swedish furniture classic, is an exclusive gift book of 252 pages and is aimed at those who are interested in furniture, design, craft tradition, form and history. The book is in Swedish only.

Wood – an entire science of its own

The wooden components of our furniture are made from teak, pine or South American oak and are always of the highest quality. This allows our furniture to age gracefully, even gaining in beauty when used frequently. Just like any other living material, the wood is affected by humidity levels, direct sunlight and more. If you care for your furniture, you will be able to enjoy the lustrous wood finish for many years to come, even though kept outdoors. Visit grythyttan.net to read more about all our wood and, more importantly, about how our unique pine is produced at grythyttan.net

A tale for generations

Grythyttan Stålmöbler is part of Sweden's industrial history, a part that continues to grow. 125 years ago, we manufactured horseshoes. Today, we produce outdoor furniture in a supply chain that aims to have the least possible environmental impact. Our factory in Bergslagen manufactures chairs, tables and sofas that are made to last for generations. Or, as our CEO Karl Lindqvist's grandfather Arthur put it, "When you buy summer furniture from Grythyttan, your furniture needs are solved for many years to come." The lifetime of our products is our most important contribution to a society in which we better utilize the planet's resources and create better living conditions for everyone. Our furniture is designed to bring more beauty, tranquillity and freedom to our surroundings wherever there is space: a park, a pavement, a backyard or your own garden. Please take a seat!
