

Lilla Åland

SOLID BIRCH CHAIR

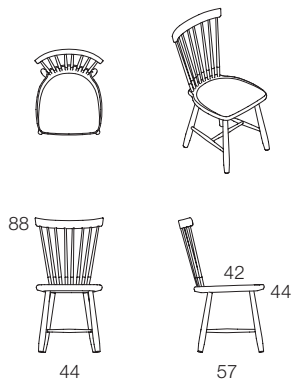

DESIGN: CARL MALMSTEN

9012

SCALE 1:50

DETAILS

1. Each back pin is grooved at both ends, providing a larger attachment area for the glue, thus increasing durability. The narrowing of the back pins upwards forms a strong, springy and comfortable back support.
2. The hollowed top section further increases comfort.
3. Recessed seat for greater comfort.
4. Reinforcement in the form of a crossbrace between the chair legs.

FACTS LILLA ÅLAND

CONCEPT

Lilla Åland is a real stalwart in the Stolab range and a favourite that has represented excellent Swedish 20th century design on many occasions. Carl Malmsten was inspired by a visit to the Finnström Church on Åland, which contained a number of stick-back chairs lined up. He drew them and after a few of his own adjustments and additions, typical of his own particular style, serial production could commence.

DESIGN

Carl Malmsten

ITEM NO.

9012

STYLE

Solid birch

FINISH

Clear varnish, soap, oil or stain

OTHER

Lilla Åland is also available as an armchair. Supplied ready-assembled.
